PROFESSIONAL SUMMARY

Business Operations Analyst with 4+ years of progressive experience providing program leadership for technical programs, enterprise workflow automation, and operational governance in fast-paced corporate and regulated environments. Proven ability to manage multiple concurrent initiatives, maintain program data and KPI visibility, and deliver data-driven insights to leadership through custom dashboards. Skilled in stakeholder management across individual contributor through executive levels, with advanced hands-on proficiency in SharePoint, Power Automate, Power Apps, and Microsoft Forms. Track record of driving continuous process improvements, including $125K in annual cost savings, 10,000+ labor hours eliminated, 95% reduction in manual effort, and 60% faster operational response times.

CORE COMPETENCIES

Technical Program & Project Management • Business Operations & Operational Governance • Stakeholder Management & Cross-Functional Alignment (Executive-Level) • Data-Driven Insights & KPI Tracking • Custom Dashboard Development (Power BI, Tableau) • SharePoint Site Design & Document Governance • Microsoft Power Platform (Power Apps, Power Automate, Forms) • Machine Learning • Workflow Automation & Process Optimization • Budget Estimation, Expense Tracking & Procurement Support • Communication Plans & Global Program Visibility • Continuous Improvement & Operational Efficiency • Large-Scale Event & Engagement Coordination • Executive Presentation & Visual Storytelling

TECHNICAL PROFICIENCIES

Platforms & Automation: SharePoint (site creation, permissions, document governance), Power Apps, Power Automate, Microsoft Forms, UiPath

Data & Visualization: Power BI, Tableau, SQL, Python (pandas, automation scripting), Excel (advanced), Machine Learning

Project & Program Management: Jira, Monday.com, Agile/Scrum methodologies

Other: AWS, Adobe Acrobat (accessibility remediation), HTML/CSS, Web content management

PROFESSIONAL EXPERIENCE

Accessible Materials Coordinator

Dec 2024 – Present

Utah State University, Disability Resource Center — *Logan, UT*

- Provide **program leadership** for enterprise-scale automation and operational standards supporting Title II regulatory compliance across academic and administrative units; drive program delivery from design through rollout and sustained adoption across cross-functional stakeholders.
- Lead a **large-scale, multi-institution initiative** in partnership with Adobe to auto-remediate 130,000+ PDFs per semester across the university LMS, ensuring accessibility compliance with Title II regulations; serve as the lead institution coordinating rollout to additional universities across Utah.
- Maintain and analyze **program data** to support operational governance, data accuracy, reporting visibility, and execution tracking across multiple concurrent initiatives, providing leadership with real-time program health insights.
- Redesigned service delivery from reactive processing to **proactive, system-driven workflows**, improving operational efficiency and reducing response time by **60%** through enhanced intake, routing, and operational execution.
- Developed **Python automation** to identify non-compliant digital materials across global LMS environments, replacing manual audits and improving accuracy and coverage of compliance monitoring.
- Revamped **budgeting and operational progress tracking** systems using custom dashboards, delivering clearer insights on program performance and financial status to leadership decision-makers.
- Lead the redesign and migration of the Disability Resource Center's internal **SharePoint site**, structuring content and metadata to enable effective **Microsoft Copilot** search and significantly improve information discoverability and user access.
- Utilized **Microsoft Forms and Power Automate** to streamline registration processes, accommodations, and automated communications, enhancing overall program efficiency.

Lecturer, Computer Science

Sep 2022 – Aug 2023

American International University-Bangladesh (AIUB) — *Dhaka, Bangladesh*

- Communicated complex technical information through structured lectures, written documentation, and **presentations** (databases, algorithms, systems) to audiences of 100+ students, developing executive-level communication and visual storytelling skills.

- Supervised applied technology development projects, providing technical guidance, **milestone tracking**, and evaluation of deliverables to support on-time project execution across 5–8 concurrent student teams.

Automation Engineer — Digital Business Solutions

Mar 2022 – Sep 2022

British American Tobacco Bangladesh *Dhaka, Bangladesh*

- Drove data-informed automation initiatives to **optimize operational efficiency** and program delivery, generating **$125,000 in annual cost savings** and eliminating **10,000+ manual labor hours** across six business functions.
- Led **digital transformation** across procurement, HR, and inventory operations, replacing paper-based workflows with automated systems to improve operational controls, visibility, and delivery speed.
- Designed and deployed **enterprise applications using Microsoft Power Platform** (Power Apps, Power Automate) to streamline procurement requisitions, HR onboarding, and inventory management processes.
- Built automated **requisition and approval workflows** with standardized process steps, improving process adherence, reducing processing errors by **85%**, and shortening cycle times by **50%**.
- Created **custom dashboards and KPI tracking** reports to provide leadership with real-time visibility into automation program health, adoption metrics, and operational performance.
- Produced **management presentation content** communicating the strategic impact of automation initiatives to director and executive-level stakeholders, supporting alignment and continued investment.

Xcelerate Intern — Digital Business Solutions

Dec 2021 – Feb 2022

British American Tobacco Bangladesh *Dhaka, Bangladesh*

- Supported automation and **continuous improvement** workstreams focused on improving operational delivery through standardized workflows and data-supported execution.
- Gained hands-on experience with **SharePoint, Microsoft Forms, and Power Automate** for workflow automation and approval routing in a corporate environment.

EDUCATION

Master of Management Information Systems Dec 2024
Utah State University — Jon M. Huntsman School of Business
GPA: **3.96**

Master of Science in Computer Science Apr 2022
American International University-Bangladesh
GPA: **3.98**

Bachelor of Science in Computer Science & Engineering Apr 2021
American International University-Bangladesh
GPA: **3.98**

CERTIFICATIONS

- Microsoft Power Platform Fundamentals (PL-900 Path) — Microsoft
- Data Visualization — Coursera
- Python for Automation & Data Analysis — Coursera
- Technical Project Management — LinkedIn Learning

HONORS & RECOGNITION

- NR Excellence Scholarship — Utah State University
- Summa Cum Laude — Graduate & Undergraduate
- Multiple Dean's List Honors
